LipHter

3,000,000 Btu/hr
(20 Gal/hr, 75 l/hr)

* Check with the appliance manufacturer for condensate flowrate or go to our website and use the sizing calculator. As a guideline 3,000,000 BTU/hr at 96% efficiency will produce approximately 20 Gal/hr (75 l/hr).

The NT15 “NeutraPro” is ideal for neutralizing condensate from condensing boilers and furnaces operating on natural gas or propane. The condensate produced by these appliances is acidic and has the potential to harm the environment and the sewer system. The “NeutraPro” will neutralize the condensate to a more neutral pH level before it is discharged to drain.
